DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Group I claims 1-47 in the paper of October 15, 2003 is acknowledged. The traversal is on the ground(s) that the inventions are not distinct and that all art classes referred to in the previous Office action would properly be searched even if Group II and Group III claims did not exist. This is not found persuasive because the inventions have different classifications in the art and because the claims of Group I are unrelated to the claims of Group II and III and have different functions than the claims of Group II and III.

The requirement is still deemed proper and is therefore made FINAL.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1-47 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-33 of copending Application No. 09/976,195. Although the conflicting claims are not identical, they are not patentably distinct

Art Unit: 1764

from each other because both sets of claims disclose a sorbent composition comprising a support, a promoter, and a silicate and both sets of claims disclose a process for making the sorbent composition.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to utilize a sodium silicate as a support because the carrier disclosed in the claims of 09/976,195 comprises a silica compound.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Arguments

The Examiner's rejections under 35 U.S.C. 102(e) and 35 U.S.C. 103(a) in the Office Action dated May 5, 2003 have been withdrawn in light of the Rule 131 declaration.
